

# PUMA VTS1214 / 1620

Large Vertical Turning Center with RAM Head Spindle

# PUMA VTS1214/1620

With its large capacity and heavy duty machining capability,
The PUMA VTS series provides excellent productivity for large workpieces

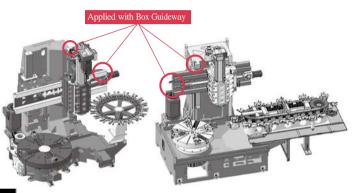

# Features

# F

#### Robust Structure

The PUMA VTS series provides optimum durability by including box guideway construction to all linear axes. The large diameter cross taper roller bearing used in the spindle construction provides high rigidity and accuracy for heavy duty machining applications

PUMA VTS1214

Ø 1350 mm (53.1 inch)

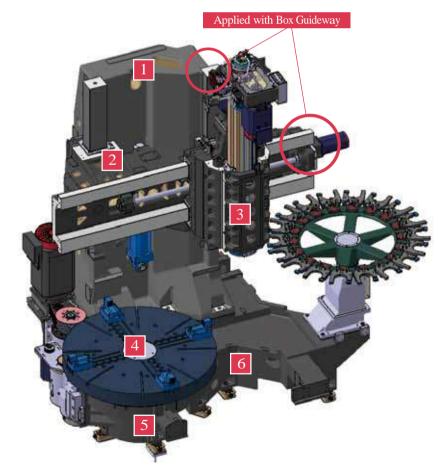

# Robust Mechanical Construction PUMA VTS 1620 series

The PUMA VTS1620M series provides extended durability and stable accuracy by implementing a large diameter cross roller bearing for the spindle and box guideways for the linear axes.

PUMA VTS1620 series

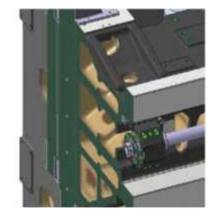

# Machine Construction

Model: PUMA VTS1620 Core Machine

A highly rigid X-type cast Meehanite column structure reduces deflection and ensures optimum cutting performance.

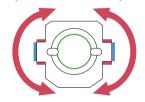

Deflection is avoided by the high rigidity crossrail and ram carriage construction.

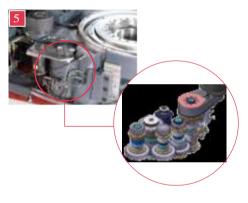

Large square cross-section

 $308 \times 250 \text{ mm}$   $(12.1 \times 9.8 \text{ inch})$ 

Wide ram guide for high torque

Ram deformation minimized by enlarged guideway design enabling heavy duty cutting.

Applied with powerful helical gears to guarantee a long life. The VTS1620M is applied with a zero backlash system to realize accurate C axis control.

Designed with large diameter cross taper roller bearing featuring high rigidity in both radial and axial directions. The gears are capable of transmitting high cutting forces.

Max. Table motor

Max. Table torque

Max. Table speed

 $45 \{ 60 \} kW \quad 19875 \quad \{ 24380 \} N \cdot m \quad 250 \quad r / min \\ (60.3 \{ 80.5 \} Hp) \quad (14667.8 \{ 17992.4 \} ft \cdot lb) \qquad \qquad () : Option \\ \end{cases}$ 

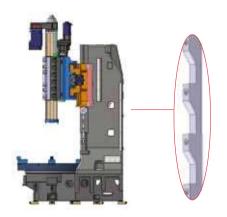

Designed in a base structure that provides a stable cutting performance to the table and carriage, using an X rib structure Meehanite casting.

# Large Workpiece Capacity and Processing Capability

### Crossrail Fixed Positions

The 4 position step block is provided to fix the W axis position of the crossrail, and in combination with a positioning pin, maintains a high level of positioning control.

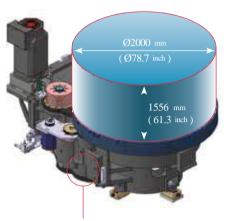

Crossrail fixed positions

$$4 \text{ steps} = 770 \text{ mm}$$
 (30.3 inch)

(actuated by hydraulic cylinder)

### **Axis Travel**

The built in 2-step gearbox provides a stable high torque drive

# Robust Mechanical Construction PUMA VTS 1214 series

The PUMA VTS1214 series has minimized heat and vibration emissions using a separable-type gearbox, and it exhibits a high rigidity in heavy duty cutting using large bearings.

PUMA VTS1214 series

Model: PUMA VTS1214 Core Machine

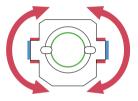

Vibration and heat generation at the spindle are minimized with a belt-driven, detachable gearbox. Cutting capacity and safety are enhanced with large diameter bearings.

Ram deformation is minimized with an enlarged guideway. A wide ram guide enables heavy duty cutting. Large square cross-section

 $308 \times 250 \text{ mm} \atop \text{(12.1} \times 9.8 \text{ inch)}$ 

Wide ram guide corresponding to high torque

24 tool magazines are reinforced with a rigid rib structure for maximum stability.

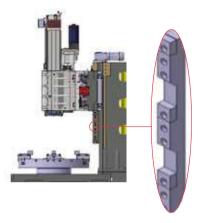

The column and spindle are rigidly supported using a grid-type, rib structure Meehanite cast. Chips can be easily discharged through the sloped top surface.

# **Cutting Capacity**

### Crossrail Fixed Positions

The 4 position step block is provided to fix the Waxis position of the crossrail, and in combination with a positioning pin, maintains a high level of positioning control.

#### Standard Feature

- 3 jaws hydraulic chuck (VTS1214/M)
- 4 jaws manual chuck (VTS1620/M)
- ATC shower coolant
- Bed shower coolant
- Column ladder and rail (VTS1620/M)
- Crossrail positioning unit
- Hydraulic unit
- Leveling bolts and plates

- Lubricant supplier
- Machine installation parts
- M code program (Drive vertical crossrail)
- Ram air blast
- Ram shower coolant
- Splash guard
- Standard tool holder
- $\bullet$  Table cooling system ( VTS1620/M )
- Tool clamp air seating checker

#### Optional Feature

- 50" hydraulic chuck (VTS1214/M)
- 50" combination chuck ( VTS1214/M )
- 63" combination chuck (VTS1620)
- 70 bar coolant
- Air conditioner
- Automatic front door
- Auto tool setter
- Chip bucket, chip conveyor

- Coolant gun
- Linear scale (X, Z-axis)
- Line filter for coolant
- Mist collector ( VTS1214/M )
- Oil Skimmer (belt type )
- Parts probe
- Signal tower
- Special chuck

- The specifications and information above-mentioned may be changed without prior notice.

- Robot interface with PROFIBUS-DP

- Tool Load Monitoring system

TOOL FUNCTION / TOOL COMPENSATION

### FANUC 32i

Standard Specifications	
AXES CONTROL	
- Controlled axes	X. Z.
- Simultaneous controlled axes	2 axes
- Axis control by PMC	
- Backlash compensation 0 ~ ± 999	9 pulses
- Backlash compensation for each ra	
traverse and cutting feed	1
- Controlled path	1 path
- HRV2 control	
- Inch / Metric conversion	
- Interlock All axes / e	ach axis
- Least input command 0.001 / 0.0001	mm/inch
- Mirror image	
- Servo off	
- Stored stroke check 1	
- Torque control	
<ul> <li>Unexpected disturbance torque detection</li> </ul>	n function
OPERATION	
- Automatic operation ( memory )	
- Buffer register	
- DNC Operation with Memory card	
- Handle incremental feed X1, X	10, X100
- Program restart	
INTERPOLATION FUNCTIONS	
- 1st. Reference position return Man	ual, G28
- 2nd. reference position return	G30
- Circular interpolation	G02
- Continuous threading	
- Dwell ( per sec )	G04
- Linear interpolation	G01
- Positioning	G00
- Reference position return check	G27

- Thread cutting / Synchronous cutting

- Automatic acceleration / deceleration

- Feed per revolution
- Feedrate override (10% unit) 0 - 200 %

- Jog feed override (10% unit) 0-2000 mm/min

FEED FUNCTION

- Cutting feedrate clamp

- Constant surface speed co	
- M - code function	M3 digits
- Spindle orientation	
PROGRAM INPUT	
- Absolute / incremental pro-	ogramming
- Automatic coordinate syst	
- Canned cycle for drilling /	Turning
- Canned cycle	
- Circular interpolation by R	programming
- Coordinate system setting	G50
- Coordinate system shift	
- Custom macro	
- Decimal point programmi	ng/
Pocket calculator type dec	imal point
programming	
- Diameter/radius program	
- Direct drawing dimension	programming
- G code system A	
- G code system B / C	
- Input unit 10 time multiply	У
- Macro executor	
<ul> <li>Maximum program dimen</li> </ul>	
<ul> <li>Multiple repetitive canned</li> </ul>	
<ul> <li>Multiple repetitive canned</li> </ul>	
<ul> <li>Optional block skip</li> </ul>	9 pieces
- Plane selection	G17, G18, G19
- Program file name	32 characters
- Programmable data input	G10
- Sequence number	N8 digi
- SUB program call	10 folds nested

- Automatic tool offset

- Tool life management

- Direct input of offset value measured B
- T - code function T2 + 2 di

- Tool nose radius compensation

- Tool offset	G43, G44, G49
	±6 digits : 64 pairs
- Tool offset value cou	inter input
	_
EDITING OPERATION	ON
- Extended part progr	
- Number of registere	d programs 500 ea
- Part program editing	
<ul> <li>Part program storage</li> </ul>	length 640 (256 KB) m
SETTING AND DISP	LAY
	ate display
- Alarm history display	y
- Display of spindle spee	d and T code at all screens
	splay
- Operating monitor s	
	nd display
- Periodic maintenano	
	isplay 31 characters
	ınt display
	ion
<ul> <li>Servo waveform disp</li> </ul>	
<ul> <li>Spindle setting scre</li> </ul>	en
OTHERS	
- Cycle start and lamp	
	10.4" Color TFT LCD
- Feed hold and lamp	
- NC and servo ready	
- PMC system	32i-PMC
- Reset / rewind	
OPERATION GUIDA	ANCE FUNCTION
- EZ Guidei (Conversatio	nal Programming Solution)
INTERFACE FUNCT	ION
- Ethernet function	Embedded ethernet
Optional Speci	ifications
AXIS CONTROL	

- Stored pitch error compensation - Stored stroke 2 and 3 - Stroke limit check before move

- A	ctive block cancel
- DN	C operation (Reader / puncher interface is required
- M	anual handle interruption
- M	anual intervention and return
- R	eference position shift
IN	TERPOLATION FUNCTIONS
- 31	d / 4th reference point reurn
- Ci	rcular threading
- M	ulti step skip
PR	OGRAM INPUT
- A	ddition of workpiece coordinate system pair 48 pair
- A	dditional macro variables #100 ~ #199 #500 ~ #99
	utomatic corner override
	hamfering on/off
	terruption type custom macro
	otional block skip (Soft operator's panel) 9 piece
- W	ork coordinate system preset
TO	OL FUNCTION / TOOL COMPENSATI
- A	ddition of tool pairs for tool life management 128 pair
- To	ool Load Monitoring system
- To	ool offset pairs 99 / 200 / 400 / 999 pair
ED	ITING OPERATION
	umber of registered programs& Part
	ogram storage length
	1280M( 512KB )_1000 e
	2560M( 1MB )_1000 e
	5120M(2MB) 1000 e
	TA INPUT/OUTPUT
	NC1 control
	sternal data input
	ast ethernet / Data server
- R	emote buffer
OT	HERS
	gh speed skip function anual handle interruption

- Stored pitch error compensation
